

The Integrated Solid Waste Management Program (ISWMP) was implemented to minimize waste, reduce disposal cost, maximize recovery of discarded materials for reuse or recycling, and comply with Federal and State regulations for non-hazardous wastes. The program is guided by the ISWMP Plan periodically revised to account for waste stream changes and technological developments. Thus far in FY06 the program recycled and/or diverted 43,038 tons, or approx 47%, of the entire waste stream.

Proceeds from the sales of all recyclables goes into the QRP account maintained by DRM. Historically, proceeds have been used to fund Moral, Welfare, and Recreation (MWR) projects, and environmental projects for the Post.

Other components of the ISWMP include: land application of bio-solid, wastewater, sludge to designated closed landfills, land-farming of POL contaminated soils from spill clean-up and wash-rack maintenance which is then land applied when concentrations are below 50ppm, recycling of approximately 30,000 gallons of used motor oil, composting of yard waste (leaves, grass clippings, twigs), stumps, and large brush, and using rock, concrete, and asphaltic materials as clean fill.

FLW manages recyclables through the Qualified Recycling Program (QRP) and utilizes various collection initiatives throughout the installation. The primary collection location is the Recycling Center, building 2553 which provides a drop-off service. Military or civilian personnel or Post residents can drop off materials during regular business hours, Monday through Friday. The Recycling Center accepts white paper, magazines, catalogs, newspaper, cardboard and paperboard, aluminum, plastic (type 1 & 2), glass, wood pallets, scrap metal, and used oil from Do IT Yourselves (DIYs). Even though there is no DRMO facility on FLW, DRMO still maintains a program to process excess materials, with fired brass casings and scrap metal bringing in the most proceeds. Roll-off collection containers are also located near barracks and residence halls.

What can be recycled

We will gladly accept:

GLASS — Clear, green, & brown glass. Please remove lids/caps and rinse. Labels are acceptable.

ALUMINUM — Cans and containers.

PLASTIC — TYPE 1 AND

Check container for recycle symbol. Empty, rinse, and remove caps.

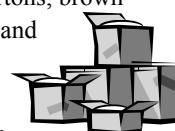

STEEL (TIN) CANS - Empty, rinse, and remove lids. Labels are acceptable.

NEWSPAPER

CARDBOARD — Corrugated boxes, paperboard (shoe, cereal, & soda boxes), shipping cartons, brown tubes, paper grocery bags, packing paper and brown envelopes.

JUNK MAIL, MAGAZINES,

COLORED PAPER— Small amounts of staples are OK. Remove plastic & cellophane. Also includes phonebooks.

WHITE OFFICE PAPER - Small amounts of staples are OK. Also includes manila folders and Post-It notes.

We cannot accept:

No aerosol cans accepted

No fuel (gas) cans accepted

Greasy pizza boxes

Wet/greasy boxes

Wet/greasy papers

Neon paper

Plastic or wax coated paper

Binders, maps, gummy labels

No carbon paper accepted

Hazardous Waste: For disposal call Hazardous Waste at 596-5951. The Recycle Center cannot accept chemicals (pesticides, disinfectants, degreasers, turpentine, paints, toilet cleaners, etc) or containers for the above-mentioned chemicals, fuel, batteries, or lighters.

Check with Recycle Center for handling of other liquids

For info on cast iron, copper, brass, and other metals, contact Recycle Ctr.
